Asset Intelligence for Healthcare & Life Sciences

Equip ID is a next-generation Asset Management and Equipment Intelligence Platform for Healthcare and Life Science institutions. It transforms ultra-low temperature (ULT) freezers, medical imaging chillers, and temperature controlled research equipment into intelligent, traceable assets. With real-time visibility into compliance, service history, and maintenance, Equip ID optimizes equipment uptime, streamlines audits, and ensure regulatory readiness all from one intuitive platform

AFFIXING NFC/QR-CODED TAGS TO EACH ASSET, EQUIP ID DIGITIZES SERVICE HISTORY, COMPLIANCE RECORDS, MANUALS, DIAGNOSTICS, AND MORE. THE RESULT: A LIVING DIGITAL TWIN OF EACH ASSET, ACCESSIBLE BY SCANNING THE TAG WITH A MOBILE DEVICE

COMPLIANCE

Our app streamlines compliance by digitizing, maintenance, audits, and verifying technician presence at your asset

DIGITAL TWIN

Transform your assets into digital twins with our advanced asset tagging program

CURATED CONTENT

Connect with a tap! Instantly access service history, manuals, videos, warranties, parts, and more

User Experience Benefits

For Technicians

- Faster diagnostics
- Reduced errors
- Streamlined parts ordering

For Researchers

- Uninterrupted experiments
- Compliance assurance
- Optimal equipment scheduling

For Management

- Data-driven decisions
- Reduced administrative burden
- Extended equipment lifespan

100%
Asset Visibility

Complete oversight of all equipment

40%
Time Savings

Complete oversight of all equipment

30%
Cost Reduction

Complete oversight of all equipment
